## CODE QUALITY

```
@Override
public String toString() {
    return "Book(" + "title=" + title + ", autor=" + autor + ", editorial=" + editorial + ", yearOfFublication=" + yearOfFublication + '!
}

public Book(String title, String autor, String editorial, int yearOfFublication) (
    this.title = title;
    this.autor = autor;
    this.editorial = editorial;
    this.yearOfFublication = yearOfFublication;
}

/**
    * @return the title
    */
public String getTitle() {
        return title;
}
```

## Rubric:

- Execution...... 0 pts. (No corre el programa)

- Json file...... 0 pts.( No se crea archivo json, no guarda información) - books list on screen...... Opts.(No se guarda ningún dato)
- Total number of books... Opts.(No hay datos)
- Code quality...... 2.pts.(falta código ,se califica por que tiene getter y setter mas constructor)
